### 3. NARRATIVE

The first seven months of 2000 were spent completing the Intermediate and Advanced portions of the Inter-Deployment Training Cycle (IDTC). From 07 March to 07 April, USS COLE participated in COMPTUEX 00-2 with COMGWBATGRU operating within the Gulf of Mexico operating areas. During the exercise, the ship received valuable training, including a SINKEX of the ex-USS DALE, TOWEX, PACFIRE, ASW, AAW, ASUW, Strike Warfare and Maritime Interdiction Operations (MIO). COLE was the only ship not damaged by enemy forces during the hostilities phase.

From 09 to 22 May, USS COLE participated in the Joint Task Force Exercise 00-2 with COMGWBATGRU, operating within the Cherry Point and Virginia Capes Operating Areas. During JTFEX 00-2, COLE received additional training in AAW, ASUW, Strike Warfare and MIO.

In Jun, COLE departed Norfolk with the GWBATGRU and headed for Vieques to complete her last pre-deployment item- NSFS. Once finished, COLE, unlike the rest of the battle group, returned to Naval Station Norfolk because she was designated to be a late deployer. On 08 August, COLE departed on deployment. Her primary operating areas were the Mediterranean and Adriatic Seas. During operations in Sixth Fleet, COLE patrolled the Adriatic Sea to help maintain stability in the former Republic of Yugoslavia during its elections.

On 10 October, COLE began her transit through the Suez Canal and into the Red Sea. The morning of 12 October, COLE conducted a brief stop for fuel (BSF) in Aden, Yemen. While in port, COLE was attacked by terrorists in an explosive-laden small boat. The explosion created a 40' x 60' hole on the port side. The ship was badly damaged, but through perseverance and courage, the crew saved COLE from sinking in Aden Harbor. The ship's crew cannot be praised enough for their outstanding actions during those trying times.

The attack took the lives of seventeen sailors and wounded thirty-seven others. The deceased were:

HT2 Kenneth Clodfelter  
ETC(SW) Richard Costelow  
MSSN Lakeina Francis  
ITSN Timothy Gauna  
SMSN Cherone Gunn  
ITSN James McDaniels  
EN2(SW) Marc Nieto

EW2 Ronald Owens  
SN Lakiba Palmer  
ENFN Joshua Parlett  
FN Patrick Roy  
EW1 Kevin Rux  
MS3 Ronchester Santiago  
OS2(SW) Timothy Saunders  
FN Gary Swenchonis, Jr.  
LTJG Andrew Triplett  
SN Craig Wibberly

This attack caused a major international incident and received a tremendous amount of media coverage. USS COLE was the focal point of Operation Determined Response, during which she received aid from the USS HAWES, USS DONALD COOK, USS TARAWA ARG, and the United States Marine Corps 4<sup>th</sup> Platoon, 2<sup>nd</sup> Fleet Anti-Terrorism Security Team (FAST).

Most of the crew remained on board while COLE was fitted for towing. Once towed out of Aden Harbor, COLE was placed aboard the MV BLUE MARLIN and shipped back to Pascagoula, Mississippi for repairs.

A Memorial Service was held in Norfolk, VA on 18 October 2000 in honor of COLE's fallen heroes. In attendance at the service were the President of the United States, the Honorable William J. Clinton, Secretary of Defense, the Honorable William S. Cohen, Chairman of the Joint Chiefs of Staff, General Henry H. Shelton, Secretary of the Navy, the Honorable Richard Danzig, Chief of Naval Operations, Admiral Vern Clark, Commander-in-Chief, U.S. Atlantic Fleet, Admiral Robert J. Natter, and a host of family, friends, and sailors from COLE. The Memorial Service was held on Pier 12 between the USS EISENHOWER, USS ROSS, and USS McFAUL. A crowd of more than 15,000 people were in attendance. Perhaps the highlight of the ceremony came when seven ambulances arrived, carrying the 37 sailors that were flown back to the United States after receiving injuries in Yemen. The sailors waved out of the backs of the ambulances and received a thundering ovation from the crowd.

The day after the memorial service, the COLE Memorial Tree was planted by families of deceased COLE sailors. The tree was planted at IOWA Point on Naval Station Norfolk to be seen by all as a reminder of our fallen heroes.

On 3 November 2000, the remaining members of USS COLE arrived back at home in Norfolk, VA. Thousands of family, friends, and national media greeted the crew upon their arrival.

On 13 December 2000, COLE arrived in Pascagoula, MS at the Litton Ingalls Shipbuilding aboard the Norwegian heavy transport ship, MV BLUE MARLIN. After receiving a patch to cover the hole from the blast, COLE was placed back into the water on 24 December. COLE is expected to undergo a process of restoration and upgrades that will last approximately a year and a half. The total for COLE's repair is estimated to be \$240 million.
